Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application,

☒ claims Nos. 20-22

because:

☒ the said international application, or the said claims Nos. (with respect to industrial applicability) relate to the following subject matter which does not require an international preliminary examination (specify):

see separate sheet

Reference is made to the following documents:

- D1: WO 03/002567 A (2003-01-09)
D2: GHORAB, MOUSTAFA M.: "Synthesis and radiation stability of some new biologically active pyrazolo[3,4-d]pyrimidines" ACTA PHARMACEUTICA (ZAGREB) , 50(2), 93-110

Re Item III

Claims 20-22 relate to subject-matter considered by this Authority to be covered by the provisions of Rule 67.1(iv) PCT. Consequently, no opinion will be formulated with respect to the industrial applicability of the subject-matter of these claims (Article 34(4)(a)(i) PCT).

Re Item V

- 1) The subject-matter of present claims 1-23 is new (Article 33(2) PCT).
- 2) The subject-matter of claims 1-23 involves an inventive step (Article 33(3) PCT).

The closest prior art is represented by D1 relating to inhibitors of Murl for the treatment of *H. pylori* infections.

The present compounds differ from the compounds of D1 in that they comprise an additional condensed heteroring.

The technical problem underlying the present application is seen in the provision of alternative compounds for the treatment of *H. pylori* infections.

D2 relates to antibacterial compounds exhibiting the present basic ring system but different substituents (cf. compounds III in scheme 1). However, the combination of D1 with D2 would not prompt the skilled in the art to the compounds according to present claims 1 or 10, therefore, inventive activity appears to be present.

The claims 2-9 and 11-18 designate preferred embodiments and are therefore

also inventive.

The claims 19-23 relate to the preparation or the use of the inventive compounds and are therefore also fulfilling the said requirement.
